Full written information of Feeding instructions, Worming and Flea Treatments.

Each Puppy are being Worm Treated every two weeks from two weeks of age.

Each Puppy will be preventative Flea Treat.

Pictures are of Mother, Puppies and a previous Litter to show you an idea of what they will look like when a little older, new pics will be added as they grow.

Why the mix of Flatcoat to Golden?

Well the Flat-Coated Retriever (FCR) is a superior dog with the ability to be trained to the highest of levels, and never forget what it has learnt, however this takes longer than say a Labrador, the addition of the Golden Retriever (GR) Speeds up this training and adds a little more Steadiness to the breed.

This information is not just based on my knowledge and Experience but that of Guide Dog For The Blind as well.

This will Be Amazing dogs that will Look just like a FCR and have all the charm.
