DEACTIVATED INERT. 2.36" HEAT (High Explosive Anti-Tank) (Hollow Charged) Bazooka M7A1 Rocket. O 1351 - O 1351

DEACTIVATED INERT. This is an American 2.36" HEAT (High Explosive Anti-Tank (hollow charged or shaped charge)) Bazooka M6A3 Rocket which replaced the M6A1 rocket in January 1944. This all steel rocket retains most of its original olive green original finish. The projectile is stencilled in white around the circumference ROKHET over M6A3 . The propellant tube and rear stabilising fins unscrew from the warhead and the fins retain the wiring connectors for firing the rocket. The brass percussion primer for the warhead together with the safety pin on the propellant tube are present. No licence is required to possess this inert round in the UK if retained as part of a collection or display. The price includes UK delivery. O 1351
