Details

Foolproof barrel installation - every time

The STRASSER RS 05 straight-pull offers as factory standard easy calibre changes through barrel replacement via hydraulic barrel clamping.

With this novel system patent pending, the barrel is held in the receiver ring by constant,

circumferential hydraulic force.

Unlike other systems using simple clamping bolts, the barrel is held with a constant uniform pressure.

This is a system that guarantees the same clamping pressure for a perfect return to zero every time - without the use of a torque wrench.

One for all - calibre changes made easy

The STRASSER RS 05 is designed and constructed for all hunting situations and functions safely and reliably with all calibres.

Its unique locking flap makes changing bolt heads simple, even for untrained users. Bolt heads for standard and magnum calibres are available.

Ergonomic design for optimal convenience

The STRASSER RS 05 proves its superiority in every detail, even to include the magazine change.

Two lightly convex release buttons on each side of the receiver housing are so placed that, when pressed simultaneously, the magazine can only fall into your waiting hand.

A gun is only as good as its trigger...

The STRASSER RS 05 has solved the trigger problem with a patented solution found nowhere else.

The trigger group can be removed without the use of tools. Its combination single-single-stage set trigger can be set to three pull weights between 800 and 2500 grams - naturally without the use of tools.

At the proper trigger setting, even cold-numbed fingers can pull off a sure shot on those difficult winter hunts.

The set trigger can be adjusted to a pull weight of 100-200g.

The trigger is automatically unset as soon as the bolt is opened, more proof of the full safety on the STRASSER RS 05.

Leave nothing to chance with an integral scope mount.

The STRASSER RS 05 is configured for our proprietary three-point ball-seat telescopic sight mount. Based upon the sphere, the most perfect form in the universe, this mount lays extremely low and always returns to zero. Only one hand is required to remove or replace the

Technical data

Calibres

Mini calibres MIN .222 Rem., .223 Rem.

Standard calibres STA .243 Win., 6,5x55 SE, 6,5x65 RWS, .270 Win., 7x64, .308 Win., .30-06, 8x57 IS, 8,5x63, 9,3x62
