INERT DEACTIVATED. This is an Unfired early pattern British 2 inch medium mortar toffee apple trench mortar first introduced onto the trenches in mid-1915. The bomb is 9 inches in diameter but the projecting rod is 2 inches in diameter, hence the 2 inch designation referred to the diameter of the mortar tube. The mortar is complete with its original 2 inch detachable launching tube and brass transit plug. This round has been professionally repainted in the correct colours. No licence is required to possess inert rounds in the UK if retained as a part of a collection or display. Delivery by arrangement and at cost. Sn 17169:7

£350.00
