Built for the harshest of weather conditions, the 457 Synthetic combines an extremely durable nitride finish with a hardy black polymer stock. Like all 457s, the Synthetic utilizes our easily-swappable barrel system, enabling conversion between barrel lengths, profiles and chamberings in minutes.

The 457 Synthetic's ergonomically superior stock shape is borrowed from the popular 557 centerfire rifle, allowing it to accommodate both right-handed and left-handed shooters. A soft rubber butt pad increases comfort and a soft-touch finish secures it firmly in the hand. Another perk of this stock is a significant weight reduction, allowing the rifle to clock in at only 2.4 kg!

Equipped with a varmint barrel threaded 1/2x20 UNF, the Synthetic can be had in .22 LR, .17 HMR or .22 WMR with a 20" barrel, as well as a shorter, stiffer 16" version in .22 LR only. Like all of our rimfire rifles, this 457 has a 11mm dovetail milled into the top of the receiver, facilitating easy mounting of optics.
