Sharps 1859 Patent .32 Rim Fire Calibre 4 Barrelled Pocket Derringer. A 1064 - A 1064
4 barrelled derringer pistols were made by the C. Sharps Company beginning with the 1859 Patent. Production of the Sharps, 4 shot pistols ended in 1874. This is an excellent original Sharps 1859 Patent 4 barrelled pocket derringer in .32 RF calibre. It is a fully functioning example. The pistol has a cluster of 4 x 2 1/2" steel barrels and measures 5" overall. The barrel's bores are clean with crisp rifling. The frame is steel. It has a brass blade fore sight and grooved frame rear sight. The right side of the frame is stamped 'C. Sharps Patent Jan 25 1859'. The bottom of the barrel rib is stamped '2763'. It has a revolving firing pin and loading is achieved by depression of a knurled button on the frame. The barrel cluster can then be moved forward for loading of rounds. It has a sheathed trigger & American Rosewood bag shaped grips which are undamaged. It's loading cocking and firing actions work correctly. The price includes UK delivery. NB As an antique obsolete calibre weapon no licence is required to own this item in the UK if retained as part of a collection or display. A 1064
