- Air Rifles
- Walther
- Break Barrel
- .177 (Pellet)

Description

This new rifle from Walther has an adjustable match trigger, a fully adjustable rear sight a safety switch on the top of the rifle, and best of all, is spring piston operated! The stock is made from a very nice high quality beech and the cocking action is very smooth. The cocking action is started with the lever underneath the barrel and then is very easy to pull the barrel the rest of the way down. The front sight is removeable and there are groove rails in the top of the rifle to mount any optic of your choice. This has a rifled barrel and is very nice to fire with not much of a kick at all! The end of the barrel is also removeable to reveal a standard 1/2" UNF thread to attach a wide range of silencers.

Please note this does not come with the scope pictured.

Don't forget to order your 22 pellets with this product.
