INERT DEACTIVATED. German WW1 Model of 1915 Inert German Diskushandgranate (disc grenade). Sn. O 1092 - O 1093

INERT DEACTIVATED This is an original WW1 inert German Model of 1915 Diskushandgranate (Disc grenade). Also known by the nickname 'Oyster Grenade' for obvious reasons, they were intended to be used like skimming stones across water from trenches and bomb craters in 'No Man's Land.' They are an assault grenade, that is they could be used by an attacker and thrown sufficient distance so that the blast effect and shrapnel caused by the thin steel casing would not be a danger to the person throwing it. This grenade is typical, 4.5 inches in diameter and 2 inches deep. It contained 6 channels each containing a detonator so that whichever one came in contact with a hard surface caused the grenade to explode. An early 'all ways' fuse. This is a nice inert original example and the price includes UK delivery. Sn. O 1093
